

March 15, 2007

Dear Customer,

Thank you for being one of our valued Cable TV subscribers. Hargray is pleased to announce some important developments regarding our Cable TV programming.

As you know, we are upgrading our telephone/cable facilities in order to bring the latest communication and entertainment services including landline telephone service, high speed internet, digital television and wireless service to the Ridgeland area. Many of you live in an area that has already been completed and these services are available to you now. We are working as fast as we can to complete this project and anticipate we will complete build-out within the next six months.

You may have noticed that as a result of the upgrade, you are receiving 13 additional CATV analog channels that are now part of your permanent channel line-up. Due to the increased programming cost, the price of your existing CATV analog service will increase to \$39.95 effective June 1st. If your area is yet to be upgraded, please check with our office frequently, as we continue to bring more homes on line weekly. Once your area is upgraded, you will also receive the additional 13 channels and the price increase will go into effect at that time.

We encourage you to take advantage of our special offer and upgrade your existing CATV service to one of our exciting digital bundles. The more Hargray services you subscribe to, the greater the value, and the more you save. Digital TV provides you superior sound and picture quality, with more clarity, more vivid colors, and a much sharper image - you will be amazed at the difference.

Special Offer

Sign up before May 31st and receive Free Installation and a 25% discount off the cost of your selected bundle for the first 3 months.

Currently our Digital Classic Cable provides you with over 100 broadcast network and regular program, sports, and news channels, 46 commercial-free music channels, pay per view events, and movies on demand. Premier Cable gives you 36 movie channels plus all of the features of Classic Cable. Treat yourself to high definition programming and digital video recording capabilities and you will experience a whole new way of watching TV.

It's easy to switch your telephone service to us. You can keep your same telephone number you have now and receive high quality telephone calls. Combine our home telephone service with CATV and you can enjoy new features such as Caller ID on TV. Our High Speed Data Service will speed up your Internet surfing, shopping, and emailing, and soon you will be able to have Caller ID on your PC.

We have enclosed a copy of the complete Ridgeland Channel Line-Up for your convenience. If you keep your current CATV service, then effective April 15, your channel line-up will be channels 2 – 76. If you upgrade to a Digital Bundle then your channel-line will include the additional programming and music channels that correspond to your selected bundle as indicated on the attached line-up. If you need additional cards, please visit any of our retail stores or www.hargray.com.

We thank you for choosing Hargray to be your communications and entertainment provider.

Sincerely,

Karen Ehrhardt
Director of Marketing
